- [davidbertsan.github.io](https://davidbertsan.github.io)

## SKILLS

- Kotlin
- REST APIs
- Jetpack Compose
- Clean Architecture
- MVVM
- Coroutines
- PostgreSQL
- Git, GitHub

## LANGUAGES

- Spanish (Native)
- Valencian (Native)
- English (Intermediate)

## PROFILE

Android Developer with experience in Kotlin Multiplatform, Jetpack Compose and Clean Architecture. Two complete projects: one built in a professional environment under SCRUM and one as a final degree project with a custom REST backend in Ktor + PostgreSQL. Convinced that clean code is the only way to scale.

## WORK EXPERIENCE

### Axarnet

02/2026-05/2026

Android Developer

- Developed ClientApp, a KMP app for domain and service management, using Kotlin Multiplatform and Jetpack Compose
- MVVM + Clean Architecture with Koin
- Consumed REST APIs (GET/POST/PATCH) and worked under SCRUM methodology

## EDUCATION

Higher National Diploma in Multiplatform  
Application Development

2024-2026

Historiador Chabas

## PROJECTS

### QuickAdapt- Android App for SME Management

*Kotlin - Jetpack Compose - KMP - Ktor - PostgreSQL - Clean Architecture*

- Custom REST backend in Ktor: 35+ endpoints across 9 PostgreSQL tables (companies, teams, users, projects, time tracking, messaging)
- Full-stack multi-tenant architecture with separated layers (data/domain/presentation)
